What is a hybrid inverter 5000W 48V volt axpert vmiii?

It offers up to 5000W of power output and allows us to connect panels to work in a hybrid way. This Hybrid Inverter 5000W 48V Voltronic Axpert VMIII can work with a high voltage photovoltaic field, just like the grid tie inverters. This simplifies connection, increases efficiency and reduces high current losses.

Is a 6 kW inverter worth it?

The combination of these two things means that it's probably not worth your while having a system at 6 kW. A 5 kW inverter will be the most cost effective. And the extra 1 kW of panels means that you'll get best use out of your inverter - it will spend more time running at its peak output.
