How much does lithium carbonate cost in China?

The corresponding price assessment for lithium carbonate, 99.5% Li₂CO₃ min, battery grade, spot price range, exw domestic China, was 580,000-600,000 yuan (\$79,378-82,112) per tonne on November 3, up by 15,000-20,000 yuan per tonne from 560,000-585,000 yuan per tonne a week earlier.

Will Chinese sellers lower Lithium prices if Chinese prices are too high?

A Chinese lithium trader echoed this view, adding: "Even if the consumers in Japan and Korea find those prices [for battery-grade lithium carbonate] from Chinese sellers too high, it is not likely that Chinese sellers would lower their prices, considering the strong Chinese market."

Why did Japanese traders stop delivering lithium orders after power rationing?

Apart from the Chinese lithium producers, whose spot supply has remained tight after the power rationing during August in China's Sichuan province, multiple Japanese traders also told Fastmarkets that they were only delivering orders under long-term contracts while their spot trading was muted because no additional material was available.

Will China's deflationary pledges affect lithium supply?

The Chinese government pledged capacity cuts to major industries that have suffered from deflationary pledges in recent years, driving investors to bet on an outlook of lower lithium supply out of the world's top refined lithium producer.

What happened to lithium in 2025?

Lithium fell to 81,991.80 CNY/T on August 15, 2025, down 0.01% from the previous day. Over the past month, Lithium's price has risen 26.24%, and is up 11.55% compared to the same time last year, according to trading on a contract for difference (CFD) that tracks the benchmark market for this commodity.

How has lithium changed over the past month?

Over the past month, Lithium's price has risen 26.24%, and is up 11.55% compared to the same time last year, according to trading on a contract for difference (CFD) that tracks the benchmark market for this commodity. Historically, Lithium reached an all time high of 5750000.00 in December of 2022.

The cost of a lithium-ion battery per kWh can range from \$200 to \$300 depending on the manufacturer, the capacity, and other factors. This cost has been ...
