What should I do if my base station doesn't turn on?

Ensure your power adapter and base station are securely plugged into a functioning power outlet. If the base station is plugged in but doesn't turn on, try plugging it into a different outlet to confirm if the chosen outlet was the issue. It would help if you also inspected your powered cable for any visible damage.

What happens if a base station goes off?

When the base station is off due to a battery drain. When an alarm goes off, this feature is designed to ensure your base station doesn't look conspicuous. So, if an entry sensor triggers an alarm when someone breaks in, the base station will automatically turn off to reduce the likelihood of it getting targeted.

Can a basestation be plugged in without power management?

Next go to SteamVR -> Settings -> Basestation and click Power Management to access the correct interface page. Yes - since the basestations are mechanical devices, if you leave them plugged in without power management enabled and they stay fully powered on and spinning - that uptime will count against the unit's lifespan.

When does the light on my base station turn off?

The light on your base station is designed to always be on when the device is working. Your base station will only turn off when one of the following happens: When the base station is off due to a battery drain. When an alarm goes off, this feature is designed to ensure your base station doesn't look conspicuous.

How do you reinstall a base station?

To do this, Unplug your base station from the powered socket. Open the battery door using a Phillips screwdriver. Remove the batteries. Wait for 30 to 45 seconds. Reinsert the batteries and put the battery door back in place. Plug the base station back into the power socket and wait for it to come up.

Why does my base station keep announcing 'alarm off'?

If your base station keeps announcing "Alarm Off", check to ensure your Key Fob isn't being pressed (if you have one). Your SimpliSafe Key Fob can arm/disarm your alarm system with the press of a button. If the Key Fob is pressed (knowingly or unknowingly), this could cause an "Alarm Off" announcement.
