Will Botswana build a 100-megawatt solar plant?

Botswana has awarded a \$78.3 million contract to build a 100-megawatt solar plant to a consortium led by China Harbour Engineering Co. The project which is Botswana's second utility-scale solar facility is set to be completed in the second quarter of 2026.

When will Botswana's second solar power plant be completed?

The project which is Botswana's second utility-scale solar facility is set to be completed in the second quarter of 2026. Botswana has awarded a major contract to build a 100-megawatt solar power plant to a group of Chinese companies led by China Harbour Engineering Co.

How much does Botswana's solar project cost?

The project is a key development in Botswana's renewable energy sector, marking the country's second utility-scale solar facility. The contract which is valued at \$78.3 million includes partnerships with China Water and Electric Development Co. and local investors.

Where is Scatec ASA building a solar power plant in Botswana?

In March, Scatec ASA began construction of a 100-megawatt solar power plant in Botswana's northeast. The initial 60 megawatts of this project are expected to come online by the end of this year. The Ministry of Minerals and Energy is also working on additional renewable energy projects.

What is Scatec Asa doing in Botswana?

This ambitious goal is part of a broader effort to diversify the country's energy sources and reduce reliance on coal. In March, Scatec ASA began construction of a 100-megawatt solar power plant in Botswana's northeast. The initial 60 megawatts of this project are expected to come online by the end of this year.

Why did Pan African hire juwi to build a solar farm?

In May 2022, fed up with the Eskom-imposed electricity rationing that forced the company to curtail its power use by as much as 20%, gold mining company Pan African decided to hire JUWI to build a 10-megawatt solar farm to power its treatment plant east of Johannesburg.
