What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

What is an uninterruptible power supply (UPS)?

An uninterruptible power supply (UPS), with a 1kVA/600W capacity and line interactive design, provides battery backup for computers, servers, and office networks. It has a 220V/120V AC output voltage and is brand new, high quality, and inexpensive.

How does a 5V uninterruptible power supply work?

Many commonly available 5V Uninterruptible Power Supplies feature a two chip design with a Li-Ion battery charger to charge the back-up battery, and boost converter to step up the battery voltage back up to 5V. Like most of my personal designs, cost was not a primary driver.
