Is solar street lighting a viable solution in the UK?

Solar street lighting is becoming an increasingly attractive and sought-after solution in the UK.

What is solar street lighting?

Solar street lighting is an excellent solution for temporary or essential works lighting. Solar lights, using redeployable solutions such as the below concrete blocks, can be installed quickly without the need for a mains connection, providing immediate illumination. This flexibility is beneficial for essential work or emergency repairs.

What is vibrant solar street lighting?

At Vivid Solar Street Lighting we design and build carbon neutral solar lighting solutions that work as an alternative to conventional street lighting in both commercial and domestic settings.

Do solar streetlights work in the UK?

Vivid Solar streetlights have been tried and tested to work in the UK. What is the expected lifespan of a solar streetlight? The led units in the lights have a service life of 100,000 hours, the battery system has a warranty of 5 years and the solar panels 10 years.

Is solar street lighting a sustainable choice?

With solar lighting, you're in control of your lighting needs. Once installed, solar street lighting operates at virtually no cost. With no ongoing electricity expenses, solar street lighting is not just a sustainable choice, but a financially savvy one. This is especially true as global energy prices continue to rise.

Is solar lighting possible in the UK?

While we do have lower irradiance levels than for example Europe, which can be problematic for some locations, especially in the North, solar lighting in the UK is not impossible with careful planning. A common misconception is that the UK's cloudy weather makes solar lighting impractical.
