Why should you choose an off-grid solar system in Cape Town?

Nevertheless, battery costs are reducing at a high rate, so the demand for an off-grid solar system is now increasing, even in cities and towns. There are many advantages to an off-grid system Cape Town. The climate on the West Coast is perfect for solar production.

Are Cape inverters compliant?

A certificate of compliance is issued upon installation. All products have warranties. Contact our team for any sales or technical enquiries. Secure Payment options available. Cape Inverters are known as trusted experts in installing reliable, compliant inverters and solar backup systems to keep the power on during load shedding.

Why should you choose an off-grid system in Cape Town?

There are many advantages to an off-grid system Cape Town. The climate on the West Coast is perfect for solar production. It's also the best way to avoid power outages when Eskom cant produce enough electricity. They are also the best way to produce electricity if you live in rural areas where a grid connection is not an option.

What is an off-grid Solar System?

An off-grid solar system can store energy in batteries for use during outages. You can even choose to disconnect from the grid and rely on the system for power. The high cost of batteries and inverters implies that the off-grid solar system is costly than the alternatives, so they are usually needed only in more remote areas far from the grid.

Who makes ginlong inverters in South Africa?

Founded in 2005 in China, Solis, the inverter brand of Ginlong Technologies, has expanded its market to South Africa since 2015 and announced the expansion of its production capacity in 2020. Ginlong has a wide range of inverters designed for the needs of the South African market, which has specific local risks and characteristics.

Why are off-grid solar systems so expensive?

The high cost of batteries and inverters implies that the off-grid solar system is costly than the alternatives, so they are usually needed only in more remote areas far from the grid. Nevertheless, battery costs are reducing at a high rate, so the demand for an off-grid solar system is now increasing, even in cities and towns.
