Will Cape Town own a solar plant?

The city of Cape Town, South Africa, has started building a 7 MW solar plant that it will own and operate. It has also launched a tender for a 5 MW/8 MWh battery energy storage system to be built at the same site. Cape Town is set to become the first city in South Africa to own and operate its own solar plant.

How many solar panels have been installed in Cape Town?

The facility is the first utility-scale renewable energy project in Cape Town and the first-of-its-kind in South Africa to be owned and operated by a city. Since construction on the project began in October 2024, around 2 400 solar panels have been installed.

Where is Cape Town building a solar power plant?

The city is currently building a 7 MW solar facility in Atlantis, about 40 km north of Cape Town, with plans to increase capacity to 10 MW in the future. The R200 million (\$11.3 million) project is being managed by the Lesedi Technoserve consortium, which is responsible for the engineering, procurement, and construction.

What is solar & storage live Cape Town?

REGISTER NOW Solar & Storage Live Cape Town offers you a unique opportunity to connect with a large and exceptionally senior audience.
