What is a mobile solar lighting tower?

The Mobile Solar Lighting Tower comes in a variety of configurations to meet your site lighting, temporary construction lighting or construction site lighting plans. Because these portable construction lights are powered by the sun, they run completely silent and create no vibration.

What is commercial solar powered portable lighting?

Commercial solar powered portable lighting is an efficient way to drastically decrease electricity bills. Our 100% off-grid system helps you save big money as it does not require trenching and has low maintenance costs for temporary construction lighting. Greenshine has more than 30 years of experience in offering portable led light towers.

Why should you choose a portable solar light tower?

Less maintenance means less time and money spent on temporary lighting for construction sites. Our portable solar light towers are constructed with mono-crystalline panels that are the most efficient on the market today (20% of total possible power), surpassing poly-crystalline (rated at 15% efficiency).

Where can I find more information about solar LED lighting fixtures?

Please visit our Solar LED Lighting Fixtures page for additional details and specifications. Greenshine provides solar LED light systems that meet the standard lighting requirements for public areas while avoiding the cost of installation of standard grid-powered lights.

Do temporary site lights need a lot of maintenance?

Temporary lights require less maintenance than traditional temporary site lighting-an occasional cleaning to get obstructions off of the panels, battery replacements, but not much else. Traditional temporary site lighting for construction sites (High-Pressure Sodium typically) require more frequent replacements.

Are portable construction lights silent?

Because these portable construction lights are powered by the sun, they run completely silent and create no vibration. Preventative maintenance is a non-issue for our temporary lighting solutions with only the batteries that need to be changed every 5-7 years for construction led lighting.
