What is a containerised generator set?

On a regular basis, containerised generator sets (CGS) are placed on board ships to provide replacement power in case of a damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers. There are currently no clear rules and requirements for such time limited installations.

Why should you choose Cummins Power Generation containerized series generator sets?

Factory pre-integrated and customizable per site requirements, the new Cummins Power Generation Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.

How do you install a generating set?

remove the tractor. (Also refer to the relevant section of the generating set installation guide.) Make sure the ground is hard enough to prevent the assembly from sinking. Using the jockey wheel or stands ensure the generating set is level. Lock the handbrake. Lower the rear stands and lock them.

What is a series generator set?

Series generator sets will meet your needs and expectations through a selection of pre-configured models and options. Customized solutions are also available with a wide selection of fuel systems, circuit breakers, controllers, filtration and cooling packages.

How to maintain a generating set?

A 1 m clearance around the generating set must be considered as the minimum requirement for problem free maintenance. Make sure the doors of the canopy can be opened completely, the equipment is easily accessible for maintenance and the generating set can be removed from the room.

How to choose a marine generator?

The generator should be suitable for the marine environment, preferably documented through a class society's product certificate, type approval or similar. Normally the generator rating shall be less than or equal to the generator it replaces.
