Can Eritrea harness wind energy?

Mr. Tesfay Ghebrehiwet, the Director of Renewable Energy at the Ministry of Energy and Mines, said that given that Eritrea has high potential of harnessing wind, the prospects of an extensive use of wind energy in the country looks promising.

Where is wind power located in Eritrea?

The wind sites in Eritrea, which are distributed all over the country, can roughly be divided into three regions: the Coastal Region, Western Lowlands, and Central Highlands. The most potent site for wind power is the Coastal Region of Eritrea, Southern Red Sea Coast in particular.

How does Eritrea generate electricity?

Currently, Eritrea's electricity generation mode - in the interconnected and independent platforms - mostly depends on diesel fuel powered turbines. This is both expensive and harmful to the ecosystem.

Where can wind power be installed?

The most potent site for wind power is the Coastal Region of Eritrea, Southern Red Sea Coast in particular. An overview of Eritrea's energy sector shows that many villages in the Central highlands and Southern Coastal region are suitable for the installation of wind energy turbines.

What challenges has Eritrea faced since its independence?

Since its independence, one of the major challenges Eritrea has been facing is the provision of sustainable energy in the country for industrial, agricultural as well as household consumption and making it equally accessible to the entire population.
