Does Fiji have a radio station?

13 AM, 40 FM, and no shortwave stations (1998). Fiji TV, a publicly traded company on the South Pacific Stock Exchange, operates a free to air channel ever since its inception in 1994. Radio is a key source of information, particularly on the outer islands. There are publicly and privately owned stations.

Will Fiji be anchored by a cable landing station?

The facility will be anchored by a cable landing station, housing four Google-built subsea cables. The cables will connect Fiji to the US, Australia, Japan, and South America. Other specifications of the project have not yet been shared.

Will Fiji build a second subsea cable?

In August 2023, Fiji said it was in talks to build a second subsea cable. Now, the island will be joined by the Bulikula cable, connecting Fiji and Guam; the South Pacific Connect Interlink cable, connecting Fiji and French Polynesia; and the Tabua cable, connecting Australia, Fiji, and the US.

How will Fiji become a digital hub?

"This is more than just an infrastructure project; it's a defining step towards placing Fiji at the heart of the global digital ecosystem." The facility will be anchored by a cable landing station, housing four Google-built subsea cables. The cables will connect Fiji to the US, Australia, Japan, and South America.

How many Google cables are there in Fiji?

Now, the island will be joined by the Bulikula cable, connecting Fiji and Guam; the South Pacific Connect Interlink cable, connecting Fiji and French Polynesia; and the Tabua cable, connecting Australia, Fiji, and the US. All three Google-owned cables will be ready for service by 2026. Details of the fourth Google cable are not known.

Will there be a 4th Google cable in Fiji?

Details of the fourth Google cable are not known. There are currently no hyperscale data centers in Fiji. A previous version of this story referred to the ICT project as a data center. We regret the error.
