How much does it cost to run a generator?

This means the cost to run a generator during the weekly 10-minute "exercise period" would cost around \$4 to \$5 a month. And during a power outage, the generator will use around \$20 to \$40 a day, depending on the energy load. These estimates should hopefully give you a better idea of how much it could cost to run a generator.

How much does it cost to rent a portable generator?

Renting a small portable generator costs \$40 to \$110 per day without fuel, depending on the power capacity and local rental rates. Renting an industrial towable generator costs \$300 to \$1,000 per week, depending on the size. Can portable generators run a house?

How much does a standby generator cost?

Standby backup generators are permanently installed outside the home, start automatically when the power goes out, and can power the entire house for up to 3 weeks straight. Portable gasoline generators cost \$500 to \$2,500 for a 3 to 10 kW backup unit.

How much power does a generator use a day?

According to the US Energy Information Administration, the average American household uses just short of 900 kilowatt-hours per month, about 30kWh per day. Typically, generators with 20kW of capacity are considered whole-home generators and cost more. If a generator has less than 10kW of power, it's meant for smaller jobs and will cost less.

How much does a solar generator cost?

Solar generators run quietly, produce no fumes, and can be used indoors, but can't store enough energy to power a whole home. Renting a small portable generator costs \$40 to \$110 per day without fuel, depending on the power capacity and local rental rates. Renting an industrial towable generator costs \$300 to \$1,000 per week, depending on the size.

How much does a generator cost in 2025?

According to HomeAdvisor, the typical cost of a whole-home generator so far in 2025 lands between \$1,538 and \$8,818. One of the biggest factors in the price of a generator is how much it will have to power, typically measured in kilowatts.

Natural Gas Generators: Conversely, on natural gas, at \$20 per thousand cubic feet, it would take \$2.36 an
