What types of energy storage solutions do you offer?

We offer commercial and industrial energy storage system solutions. Our air-cooling and liquid-cooling ess cabinets are safe, all-in-one solutions that are easy to maintain. Designed to meet a variety of energy storage needs, click to learn more about how our energy storage solutions can benefit your business.

Will Georgia Power install battery storage facilities at Robins & Moody Air Force bases?

As part of its 2023 IRP Update released last year, Georgia Power revealed its plans to install battery storage facilities at the site of two operational solar projects at Robins and Moody US Air Force Bases, despite these details being presented as new information in the recent press release from the utility.

Will Georgia Power Buy a Tesla Megapack unit?

Tesla Megapack unit with doors open. Georgia Power will procure Megapacks for the 500MW/2,000MWh portfolio. Image: Tesla Georgia Power has secured a battery and equipment supply agreement (BESA) with Tesla for a 500MW/2,000MWh BESS portfolio made up of four projects of varying sizes under development by the investor-owned utility (IOU).

Is a 2gwh battery energy storage system being built in Saudi Arabia?

A 2GWh battery energy storage system (BESS) project has gone into operation in Saudi Arabia, according to the EPC firm which delivered it. Project owners BSTOR and Energy Solutions Group have started building separate BESS projects totalling 440MWh of capacity in Belgium, following financial close, both of which will use Tesla Megapacks.

What is a residential energy storage system?

Our residential energy storage systems allow homeowners to store the energy produced by their solar panels during the day and use it at night or during periods of low sunlight. With our energy storage systems, residents can reduce their dependence on the grid and enjoy greater energy independence.

What is battery energy storage?

What is Battery Energy Storage ? Battery energy storage is an advanced technology that enables the capture and release of energy stored in batteries. This can be done to support the grid, provide backup power, or even store energy generated by renewable resources like solar and wind.
