How electric vehicles are being used in Ghana?

The utilization of electric mobility in Ghana is still at the infant stages of development. The Government is considering the introduction of tax exoneration for electric vehicles as part of plans to promote a technology shift from fossil fuel-based vehicles and by so doing enable the transition to low emissions transportation.

Is the EV market developing in Ghana?

The EV market in Ghana is at a nascent stage. Although there has been some progress in recent years, the industry is still far from being fully developed. There are several initiatives underway, including the development of charging infrastructure and the introduction of electric vehicles into the Ghanaian market.

Will Ghana have an electric vehicle policy in 2022?

Separately, in November 2022, the Ministry of Transport announced that it would begin stakeholder consultations on an Electric Vehicle Policy as part of Ghana's broader strategy to reach net-zero emissions in the transportation sector.

How should EV charging systems be regulated in Ghana?

Standardisation, licensing and certification: chargers, charging systems and charging installation should be regulated by Energy Commission, Ghana Standards Authority and allied agencies. Research and capacity development: EV modules and curriculum should be developed and rolled out through the Technical, Vocational Education and Training (TVET)

What is Ghana's automotive policy?

Concerning locally produced vehicles, an Automotive Policy has been developed to provide the necessary framework for assembly and manufacturing capacity in Ghana. The initial coverage is for new passenger cars, SUVs, and light commercial vehicles, which would include pickups, mini-buses and cargo vans.

How DVLA & GRA regulated charging systems in Ghana?

Thus, the Ghana Revenue Authority (GRA) customs division must work closely with the Driver and Vehicle Licensing Authority (DVLA) to address this challenge. Standardisation, licensing and certification: chargers, charging systems and charging installation should be regulated by Energy Commission, Ghana Standards Authority and allied agencies.
