Summary: Buy cheap & discount solar inverters directly from reliable China wholesalers.

Who is the best solar inverter supplier in China?

Growatt is the No.1 residential solar inverter supplier in China and is also one of the top 3 PV inverter suppliers for distributed generation solar energy. According to IHS Markit, Growatt has ranked among the World's top 3 residential PV inverter suppliers since 2018. The company has a highly efficient pre- and post-sales team.

Why should you buy a solar inverter from China?

China is one of the largest manufacturers of solar inverters in the world, and has a large pool of manufacturers and suppliers. This means that there is a wide variety of solar inverters available from different manufacturers, which can provide a competitive advantage for those looking to source from China.

What are the different types of solar inverters?

There are mainly three types of solar inverters: String inverters are the most commonly used type of inverters in residential and small commercial solar panel systems.

Are string inverters a good choice for solar panels?

String inverters are cost-effective and easy to install, making them a popular choice for small to medium-sized solar panel systems. However, if one panel in the series fails, the entire string will not produce power, so the system's efficiency can be impacted.

What is a solar inverter?

A solar inverter, also known as a PV inverter, is an electronic device that converts the direct current (DC) electricity produced by solar panels into alternating current (AC) electricity that can be used to power homes, businesses, and the grid.

What is a microinverter solar panel?

Microinverters are a type of inverter that are installed directly on each individual solar panel. Unlike string inverters, which convert the DC power generated by a series of panels into AC power, microinverters convert the DC power generated by each panel into AC power independently.
