Summary: How many devices do you plan to charge on your power bank daily? Is it just your smartphone? Or do you plan to fuel your headphones and tablet? If you plan to refuel your low-power devices like wireless he.

How to choose a small power bank?

A small power bank won't do any good if you are often on the road. Hence, you must pick the right size of the power bank. Besides that, you should also calculate the number of devices you need to charge and the charging speed.

Are power banks portable?

When it comes to portability you'll need to consider two aspects: weight and volume. They are both generally directly proportional to the device's capacity. Thus, the more mAh a power bank has, the heavier and bulkier it tends to be.

How many Mah should a power bank have?

You can also look at 30,000 mAh or 50,000 mAh power banks. On the other hand, if you are planning to go camping/hiking, it's best to rely on a heavy-duty power bank. A 20,000 mAh power bank should give you enough juice to get by before recharging.

How to choose a power bank for a laptop?

If you have a laptop with a 50,000 mAh battery, you should select a power bank with at least that capacity for a full charge. Charging Speed: Charging speed is determined by the output rating of the charger, measured in watts. A charger should ideally have an output that matches or exceeds the input requirement of your device.

How much does a power bank weigh?

Another new-age power bank like the Anker 737 -- which has a capacity of 24,000 mAh -- has a compact shape and weighs around 1.4 pounds. Besides that, it has USB-C fast charging ports. Note that conventional heavy-duty power banks take a long time to charge fully.

What are the features of a power bank?

Capacity is arguably the most important feature of a power bank. This is where most people look first and this is also why it's very common for the capacity to be listed in the actual name of the power bank. The unit of measure for capacity is mAh, which stands for milliampere-hour.
