Summary: Emergency medical technicians (EMTs) provide urgent medical care to patients while onsite and when transporting them to a medical facility. There are two different EMT certifications that allow you to wor.

How long does it take to become an EMT?

As noted, different EMT levels will take you a different amount of time to receive the certification. The first level, EMT, is about 120 hours of training. It takes about 3-11 weeks to complete, depending the course itself and the school you're receiving the training from.

How long is EMT training?

The duration of EMT training can vary depending on the level of certification you are pursuing and the specific program you choose. Becoming an EMT-Basic typically requires the shortest amount of training compared to other EMS levels. Most EMT-B programs usually range from 120 to 150 hours of training.

How long does it take to become a paramedic?

The second level, advanced emergency medical technician (AEMT) training, takes approximately 30-350 hours of training in addition to EMT training. And those who wish to be a paramedic will need to take 6-24 months of additional training and schooling. There are certain set-in-stone requirements EMTs must meet to receive national EMT certification.

How long does it take to become an emergency medical technician?

The first level, EMT, is about 120 hours of training. It takes about 3-11 weeks to complete, depending the course itself and the school you're receiving the training from. The second level, advanced emergency medical technician (AEMT) training, takes approximately 30-350 hours of training in addition to EMT training.

How many hours of EMS training do you need for NREMT?

The NREMT requires individuals to complete 10 hours of EMS training related to patient care for the individual component. The organization notes that these hours are flexible, and EMTs can apply credits below, at, or above their certification levels to this component. Check out the NREMT recertification guide for more specific requirements.

How long does it take to get an EMS license?

The NREMT recommends that you apply for your cognitive exam about four weeks before you want to take it. Once you pass your cognitive exam, you'll take your psychomotor exam at your state EMS office or an approved school. Once your certification process is complete, you'll also need to apply for an EMT license in your state.
