How long does a battery replacement take?

Physically it takes less than half an hour. But how long it will take for a particular customer depends on way too many factors including whether or not the correct replacement battery is in stock, how many technicians are available, and how many other jobs are in the queue to be performed. I personally waited about 90 minutes.

How long does a laptop battery take to charge?

The battery charges in the laptop when the laptop is connected to a power source using the AC adapter. The charge time varies depending on the laptop. If the laptop supports ExpressCharge, the battery typically will have greater than 80% charge after about an hour of charging, and fully charge in about 2 hours with the laptop powered off.

When should a laptop battery be replaced?

If you have to plug it in ever more often for recharging, this is a sign that the battery's performance is declining. However, usage time can also provide information about whether the battery will soon need to be replaced. If a laptop is used frequently, the battery may need to be replaced after just 18 to 24 months.

How much does it cost to replace a laptop battery?

Completely disassembling the device to get to the battery is a lot of work, even for professionals. Replacement by a specialist can cost 90 euros or more in this case. How long does a laptop battery last? Although battery runtime differs from device to device, most laptop batteries should last at least 3 hours.
