[Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How many 5G base stations will there be in 2025?

The number of 5G base stations per 10,000 people will reach 26 by 2025, said the plan issued by the Ministry of Industry and Information Technology (MIIT). Gigabit optical fiber network will cover most urban and rural areas, and facilities and services for data and computing will be enhanced remarkably, it said.

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

What is the future of 5G?

The future of 5G is clear: more base stations, wider coverage, and improved connectivity. Industry forecasts suggest that by 2025, the total number of 5G base stations worldwide will surpass 5 million. This expansion will be driven by ongoing urbanization, demand for high-speed connectivity, and technological advancements.

Will 5G base stations grow in 2024?

By 2024, 5G base station installations are expected to grow by over 25% annually worldwide. The growth of 5G base stations is not slowing down. By 2024, global installations are expected to increase by more than 25% annually, meaning millions of new stations will be deployed each year.

Will 5G Revolution & 6G innovation be a priority next year?

The move comes as the country charted its vision for industrial growth during a two-day work conference of the Ministry of Industry and Information Technology. With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.

China plans to build 4.5 million 5G base stations and develop more future industries in 2025, said the Ministry
