How much does solar panel installation cost?

On the high end, solar panel installation can cost over \$40,000. On the low end, it only costs a few thousand. It all depends. Additionally, none of these prices account for incentives like the federal investment tax credit (ITC), which can make your solar system up to 30% more affordable.

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

What is the average cost of a 5kW solar panel system?

The national average residential solar cost per watt installed is \$3.10 for a typical 5kW (approximately \$15,500) PV solar panels system when installed by local installers, before the 26% solar investment tax credits from the federal government.

What is the cost per watt for solar panels?

The national average residential solar cost per watt installed is \$3.10 for a typical 5kW to 7kW PV solar panels system when installed by local installers, before the 26% solar investment tax credits from the federal government.

How much does a solar system cost?

If you just need a few panels for a small do-it-yourself solar project, expect to pay around \$200 to \$350 per panel (between \$0.80 and \$1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery, which can add anywhere from \$7,000 to \$18,000 to your total solar system costs.

How much does a Tesla solar roof cost?

The cost of a Tesla solar roof depends on the size of the system you need. For an 8.5kW system, you might only need a 7kW system with a 3 IN 1 ROOF. A 3 IN 1 ROOF is expected to cost about \$27.00-\$28.00 per square foot installed.
