Can I use a power plug in Cyprus?

Select your country of residence, to check the compatibility of your power plugs in Cyprus. In Cyprus, power plugs and sockets (outlets) of type G are used. The standard voltage is 240 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters.

Do you need a power adapter in Cyprus?

In Cyprus, however, we use the British Type G socket, which features three rectangular pins. This means that most people (except those from the UK) will need a power adapter to charge their phones or laptops. Despite this discrepancy, keep in mind that the voltage across Europe (including Cyprus) remains consistent, hovering around 220-240V.

Why does Cyprus use UK plugs?

Cyprus uses UK plugs primarily because of its historical ties with Britain. During its time as a British colony, Cyprus adopted British standards, including electrical systems and plug designs. Have Anything to Add?

What voltage is used in Cyprus?

In Cyprus, power plugs and sockets (outlets) of type G are used. The standard voltage is 240 V at a frequency of 50 Hz. Cyprus is a beautiful island nation in the Mediterranean Sea, known for its stunning beaches, ancient ruins, and delicious cuisine.

Does Cyprus use 240 volts?

Cyprus uses 240 volts, the same as the UK and most of Europe. If your electronics are dual voltage, you don't need a converter or transformer. If your devices are only designed for 110-120 volts, you will need a voltage converter or transformer to safely use them in Cyprus.

What type of plug does Cyprus use?

Cyprus uses the type G plug, which is the three-pin plug with a rectangular shape. The two round pins are the live and neutral pins, and the third pin is the earth pin, which is located on the top of the plug. This plug type is commonly used in the United Kingdom and other Commonwealth countries.
