Summary: Fiji's electricity supply primarily comes from a mix of hydroelectric power stations and diesel generators. The country is actively working towards increasing its reliance on renewable energy sources like solar.

Does Fiji have a power supply?

Fiji's Type I outlets have three flat pins, so make sure to bring an adapter compatible with this configuration. Generally, Fiji has a reliable power supply. However, like many tropical destinations, occasional power outages can happen. Resorts and major urban areas usually have backup generators to mitigate disruptions.

What type of power outlet does Fiji use?

Fiji uses Type I power outlets, which have three flat pins in a triangular pattern. US plugs (Type A and B) have two or three flat parallel pins. To use your US devices in Fiji, you'll need a power adapter. It's also worth noting that Fiji operates on 240 V, while the US uses 120 V, so you might need a voltage converter for some appliances.

Do I need a power adapter in Fiji?

Fiji has Type I power plugs with 240 V AC 50 Hz - see Fiji travel adapters here. If you're coming from New Zealand or Australia (where most visitors to Fiji are from), you will not need a travel adapter. Some off-the-grid resorts may have limited power, so you may not be able to use more powerful appliances like hair dryers.

Can a universal power adapter fit a Fiji outlet?

Universal power adapters usually come with multiple plug types and can be adjusted to fit Fiji outlets and many others. If your devices are not compatible with the voltage in your destination country, a voltage converter or transformer will also be necessary to convert the voltage to the appropriate range for your devices.

Do US plugs work in Fiji?

No, US plugs typically don't work in Fiji without an adapter. Fiji uses Type I power outlets, which have three flat pins in a triangular pattern. US plugs (Type A and B) have two or three flat parallel pins. To use your US devices in Fiji, you'll need a power adapter.

What type of power plugs and sockets are in Fiji?

The power plugs and sockets in Fiji are of Type I. This is a three-pronged plug with one vertical prong and two slanting prongs. Some electrical appliances plugging into a Type I sock only have two slanting prongs. The Type I (i) power plug/socket is the type of power plus found in the following locations:
