Who supplies electricity in Lesotho?

In the present day, LEC remains the sole supplier of electricity operating within Lesotho, as well as holding the title of one of the first parastatals in the country. "Our Company operates under the obligation to supply power to all customers within our service territory," continues the Company.

How much electricity does Lesotho produce?

Lesotho produces about 72 MW from hydropower (Meula). It has about 150 MW peak power and imports more than 70 MW mainly from Mozambique (29% of peak demand) and 20% of its peak demand from South Africa. The electricity supply accounts only for +/-50% in the energy mix.

Who is Lesotho electricity company?

The Lesotho Electricity Company has worked closely with the Government on its rural electrification roll-out programme over the past few years, and it subsequently has facilitated the connections required to reach new customers on the electricity grid.

How does Power Africa support the energy sector in Lesotho?

Power Africa supports the energy sector in Lesotho by developing electricity generation projects. Additionally, various firms in Lesotho have received U.S. Embassy support to move transactions forward. For more information, please refer to the page below, which gives an overview of the energy sector in Lesotho and explains Power Africa's involvement in the country.

What are the potential energy resources in Lesotho?

Potential grid and off-grid renewable energy resources in Lesotho include hydro power, solar and wind energy. Biomass can also be considered where the material can be transformed to produce electricity either through direct combustion or via biogas. Hydro and pumped Storage
