Do ground-mounted solar panels cost more?

Generally, ground-mounted solar panels will cost more to install than an equally sized roof-mounted system. This is partly due to the structure on which the solar panels are installed. A rooftop system is supported by the roof, and the building's structure, meaning erecting a supporting structure is unnecessary.

What are the different types of ground-mounted solar panels?

There are two basic types of ground-mounted solar panel systems: Standard ground mounts use metal framing driven into the ground to hold your solar panels up at a fixed angle. Operators can manually adjust some standard ground-mounted solar panel systems a few times a year to account for seasonal shifts of the sun.

Do ground-mounted solar panels need a big roof?

If your home uses a lot of electricity, you'll need a big roof to accommodate a big solar panel system. With most ground-mounted solar panels, you can more easily size your system to match your electricity consumption without the same space restrictions as a rooftop system. How much do ground-mounted solar panels cost?

Do ground-mounted solar panels work?

As the name suggests, ground-mounted solar panels are mounted to the ground, rather than a roof. In most cases, it's easiest and most cost-effective to get a rooftop solar system. But if rooftop solar won't work for your home, ground-mounted systems offer some clear benefits.

What is a ground-mounted solar system?

Ground-mounted solar systems are free-standing structures that support solar panels. Because they can be installed wherever conditions are best for solar power production, they're a great alternative to the traditional roof-mount solar system.

Should I install a ground-mounted solar system?

Overall, installing a ground-mounted solar system can greatly reduce your monthly costs, save on taxes, and set your property up for long-term, sustainable savings. Many solar panels have 25- or 30-year warranties, guaranteeing they'll produce a significant amount of free electricity for many years to come.
