Can Norway develop a floating wind industry?

Norway has vast potential for floating offshore wind development and strong offshore industrial expertise, which can be applied in the emerging floating wind industry. The Norwegian government has announced that it will allocate areas for offshore wind power to 30,000 MW by 2040.

Where is offshore wind located in Norway?

The offshore wind field Utsira Nord is located here, one of two areas that the Norwegian authorities have opened for the development of offshore wind. The area, with its sea depths, proximity to large industrial plans and unique wind conditions, is very well suited for floating offshore wind.

How will Nordvegen Vind contribute to developing a world-class offshore wind industry?

Nordvegen Vind will, through Utsira Nord, contribute to developing a world-class offshore wind industry. Norway has vast potential for floating offshore wind development and strong offshore industrial expertise, which can be applied in the emerging floating wind industry.

What is Nordvegen Vind?

Together, we will create a world-class offshore wind industry. Nordvegen Vind is based on the historical site located close to Utsira, Nordvegen, that is considered to be the birthplace of Norway. Nordvegen Vind has an ambition to put Norway on the map yet again by developing a leading floating wind project at Utsira Nord.

What is world wide wind?

GET THE LATEST NEWS Join our Newsletter and stay up to date. World Wide Wind is a newly established Norwegian company presenting a novel solution and technology - counter-rotating vertical axis turbines - specifically designed for offshore floating wind power and representing significant improvements over current VAWT technology.

Who is Ra wind?

As a Norwegian producer of offshore wind turbines, RA Wind is determined to lead the way by reducing the unit costs of turbines and reducing the cost per produced kWh (LCOE) by 50%. RA Wind will deliver modular 20+ MW wind turbines, enabling the scalability of both fixed and floating offshore wind turbines.

The electrical energy produced by the 64 active wind farms in 2021 was 11.8 TWh. That is an increase of 19% from the year before, despite lower-than-normal wind resource ...

BEVI is one of the Nordic region's largest companies in the field of electric drive systems and power generation. We offer a comprehensive range of electric motors, transmission devices, ...

Technology/solution: ? RA Wind is a Norwegian turbine company dedicated to revolutionizing the wind energy industry by developing the world's ...

Utsira Nord will help set the standard for floating offshore wind in Norway and the development of the Norwegian offshore wind industry. ...

World Wide Wind is a newly established Norwegian company presenting a novel solution and technology - counter-rotating ...

Statkraft is a leading player in the renewable energy sector, specializing in wind power production alongside hydropower and solar energy. The company operates significant onshore wind ...

2009 Norwegian Electric Systems (NES) is officially founded, marking the beginning of an exciting journey. We start developing advanced ...

ABB provides complete power solutions for wind farms, from generation to optimization. Explore our expertise in connecting, monitoring, ...

Top Wind Turbine Companies in Norway The B2B platform for the best purchasing decision. Identify and compare relevant B2B manufacturers, suppliers and retailers

Wind Catching Systems is developing the Windcatcher - a floating wind concept with a potential to reduce the LCoE of floating wind by focusing on ...

What does this mean for Norway? In this report, we explore the conditions for Norway to engage in the production and use of solar (photovoltaic) PV technology, both ...

Looking for reliable Norwegian wind turbine manufacturers? Discover certified suppliers offering efficient 5kW-200kW turbines for residential and industrial use. Click to compare prices and ...

NordLink partners TenneT, Statnett and KfW have now taken over the high-voltage direct current (HVDC) transmission system between Norway ...

The turbines are mounted on floating concrete structures with a common anchoring system. Enova and the Norwegian Business Sector's NoX ...

Oslo / 25 September 2024 Hywind Tampen, an 88 MW floating wind power plant, powers offshore oil

Norwegian wind power system manufacturer

platforms, reducing 200,000 tons of CO2 annually. A joint innovation by Siemens Gamesa ...
