Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

Which portable power station should I buy?

If you are searching for a compact portable power station for on-the-go activities, the Jackery Explorer 300 is our recommendation. This unit is ideal for charging phones and laptops or running small appliances like lights and fans. Its small form makes it an extremely versatile option.

Do all power stations provide a power source?

While all power stations are intended to provide a power source, each model differs in their overall design and included features. Some models have an intuitive mobile app to fully control your power station wirelessly. Others may offer expandable battery capacity, and some are advertised as being used as an uninterruptible power supply.

How much does a power station weigh?

A power station's portability is directly related to its power capacity and output. Small power stations with around 300 watt hours of capacity and a max output of 300 watts, such as the Anker Solix C300 DC portable power station, typically weigh under 10 pounds. and are about the size of a lunch box.

What is the best power station?

There's no such thing as the best power station for most people, because it depends on what you need, but I have spent months testing several to find which models work for certain situations. My colleagues and I have tried systems that can provide 768 watt-hours of energy to 6.4 kilowatt-hours.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO4 power stations will last for more than 3,000 charge cycles, or about 10 years.
