How much power does a coreless permanent magnet generator produce?

Upgrade to clean and efficient energy with our Cheap Low Torque Coreless Permanent Magnet Generator. Choose from 10KW, 15KW, or 20KW power options and enjoy 10000W of alternative energy at 220V. With a coreless design and 1000RPM rotation, this generator offers reliable and consistent energy output. Specifications

What is a permanent magnet generator?

A permanent magnet generator is an electrical machine that converts mechanical energy to electrical energy. It is a type of generator that uses permanent magnets to generate an electric current. We are leading manufacturers and exporters of Permanent Magnet Generators in India. Permanent magnet generators offer high efficiency energy conversion, particularly at partial load, and require no separate field excitation system.

Can You manufacture a generator?

A: We can manufacture from 100w to 5000kw. 4. Q: What is the rotate speed of your generator? A: From 20rpm to 3000rpm. 5. Q: Can you manufacture customized product? A: Yes, we can. Please tell your detailed request (power, rpm, voltage, size, color) to our sales, we will made the generator according to your request.
