What are portable solar panels & solar battery chargers?

Portable solar panels and solar battery chargers are easy-to-use devices that provide backup power to anyone who happens to be away from a working power outlet, including hikers, car campers, and even people looking to keep their devices running during a power outage at home.

How many solar chargers are there?

We tested 34 solar chargers to power our adventures, including brands like Jackery, GoalZero, Renogy, and more. A good solar charger lets you power your essential communication and outdoor electronics, no matter how far off the grid you go. Over the last decade, we have tested almost 100 different solar panels of varying sizes.

Which solar charger is best?

Without question, the EcoFlow 220W Bifacial Portable Solar Panel is not only the most powerful solar charger we tested but also the most talented. If you have the cash, it's a great value for what you get. Ironically, Outdoor Tech Dawn Solar Panel (\$130) was a bit of a dark horse.

How much does a portable solar charger cost?

Specifically for this buyer's guide, we conducted online research and identified over a dozen portable solar chargers ranging in price from \$30 to \$649. After careful consideration, we narrowed down the candidates to a handful that we tested in real-world conditions.

What is a solar battery charger?

By "solar battery chargers," we mean lightweight, lower-wattage devices that can directly charge personal electronics while on the go, typically via USB port. "Portable solar panels" are their larger, heavier, and higher-power siblings.

What is a portable solar charger used for?

Portable solar chargers are best used to power small electrical items, such as smartphones and portable battery packs. They can be perfect for topping up the batteries of devices you might take on a camping trip, but generally aren't much help when it comes to feeding more power-hungry products, such as televisions, portable fridges and kettles.
