Should you buy a portable power station?

If you enjoy the great outdoors, camping, work on construction sites, or want to be prepared during a power outage, you should consider buying a portable power station. These lunch-box-sized power banks are highly useful, and here we'll go over a few pros, cons, and why you'll want one. What is a Portable Power Station?

What can a portable power station do for You?

They're great for construction workers on a job site, perfect for family vacations in the RV, and it's an excellent product to have in case of emergencies. Depending on the size of your portable power station, one could keep all your phones, lanterns, or crucial products like a CPAP machine running during a power outage.

What can a portable power station do during a power outage?

Depending on the size of your portable power station, one could keep all your phones, lanterns, or crucial products like a CPAP machine running during a power outage. That way, you'll be able to stay in contact with friends and family, receive weather alerts, or sleep with a breathing machine.

How much does a portable power station cost?

Portable power stations range in price from a couple hundred dollars up to several thousand dollars. Usually more expensive power stations will mean a bigger (and heavier) battery, as well as a wider range of output and input options. How long do they typically last?

How much does a portable power station weigh?

My go-to portable power station is the Anker Powerhouse 800, and it weighs around 18 lbs. It's not too big, not too small, and is easy enough to carry to the tent or sit on the picnic table. And finally, they can't run everything as a generator can. Most portable power stations have a max load limitation and only do 120V AC outlets.

What are the best portable power stations?

Product images of the five portable power stations we looked at for this guide: Anker 521, Bluetti AC200MAX, Contech S150, Ecoflow River 2 Pro, and Goal Zero Yeti 200X. The bigger the battery, the more charge it can hold and the longer it'll last in terms of powering your equipment.
