What is a USB fan?

The blade-less and hands-free design let it come true. A USB fan is a small and portable device that's handy for personal, close-proximity cooling. As the name suggests, it's powered through a USB connection, such as the one in your computer, a power adapter that you plug into a wall outlet, or a portable battery.

How powerful is a portable table fan?

The airflow of portable table fans usually ranges from 15 m³/min (less efficient) to 150 m³/min (more efficient). The higher the value, the more powerful the fan's airflow. Desk fans are designed to be small, lightweight, and easy to carry. Therefore, they are not as powerful and usually do not produce as strong gusts as professional fans.

What is a portable mini fan?

A portable mini fan is simply a mini electric fan that is not permanently affixed to the wall or ceiling. you can bring it anywhere, just throw in your travel bag, back lightly of go. Baby stroller fan is specially made for baby but also anyone. We invent this to meet baby and parents need in summer, indoors and outdoors.

How to choose a portable desk fan?

It will also be quiet. If you need a portable desk fan as part of your personal equipment, such as a laptop and mouse, and if you frequently move from one workspace to another, then it is better to choose a smaller desk fan. Your laptop's USB port powers the small desk fan, which is located close to you.

How to choose a portable table fan?

If you want to cool an entire room, you should opt for a large, rotating fan that blows in different directions. If you want to take the portable table fan to various places and use it only for yourself, you should buy a small stationary fan. Fixed head table fans do not rotate about their vertical axis. They are stationary.

How to install a portable table fan?

If you need the portable table fan mainly indoors--in the office or at home - you have two other options: You can plug it into a nearby power outlet or connect the fan to your laptop via a USB port.: Check if there is a power outlet near the place where you want to place the fan.
