When will solar panels be required in Tokyo?

Starting April 2025, Tokyo will implement a new regulation requiring solar panels on newly constructed homes. What Is the Mandatory Solar Panel Installation? Starting in April 2025, Tokyo will require installing solar panels on all new residential buildings.

How many solar panels are there in Tokyo?

The capital has around 2.67 million buildings and houses, but only 4 percent, or around 100,000, have solar panels. Mega solar installations boasting gigantic panels with a capacity of 1,000 kilowatts or more are also rare in Tokyo, where there are not many open spaces.

Will Tokyo require solar panels on new detached houses?

This will make Tokyo the first place in Japan to require solar panels on new detached houses. The ordinance will come into force in April 2025. "We have gone ahead with requiring businesses (to install solar panels)," Tokyo Governor Yuriko Koike said at a news conference held after the ordinance was approved.

Will Tokyo subsidize solar panels?

In March last year, the Tokyo Metropolitan Government established a 150 billion yen fund to subsidize the installation of solar power generation equipment for Tokyo residents. Subsidies will be provided if solar panels are installed during the construction of new eco-friendly houses or while retrofitting existing houses with insulation.

How much do solar panels cost in Japan?

The government encourages new detached houses to install solar panels, and subsidies greatly help reduce the costs of installing solar panels. Currently, the average price for a solar panel in Japan ranges from 200,000 to 400,000 yen per kilowatt (kW). Are there subsidies for installing solar panels in Japan?

How many kW is a solar panel in Japan?

5kW is the national average for installing solar panels in a home in Japan. The amount varies depending on the region and the property's roof size. The maximum for a household is 10kW. Do I need a storage battery with solar panels?
