Is Barbados a leader in solar energy?

Continue reading -> Barbados continues to maintain a leadership position in solar energy within the Caribbean. Building on a successful Renewable Energy Rider program which has seen 9MW of distributed solar PV installed, the electricity market has finally opened up to independent power producers (IPPs) to develop utility scale solar projects.

Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is "high". If you could purchase a ... Continue reading ->

What telecommunications services are available in Barbados?

The telecommunications market in Barbados is quite competitive. The leading service providers of Flow Barbados (previously known as Cable and Wireless or Lime) and Digicel Barbados offer various cell phone deals with different billing options. They both operate on a GSM network and offer international roaming options.

What are Barbadian government's plans for renewables?

The Barbadian government has announced plans for more regulation and to attract more investment in the renewable energy sector. The focus of the Barbadian renewables market is on solar photovoltaics, but there is increasing interest in wind, waste, biomass, and ocean and wave energy. Electric buses have also been added to the public transportation fleet.

What is the best prospect industry sector for Barbados?

Renewable and alternative energy is a best prospect industry sector for Barbados. This includes a market overview and trade data. The government has announced plans for more regulation and to attract more investment in the renewable energy sector.

What is happening in Barbadian renewables market?

The renewable energy market in Barbados is currently focused on solar photovoltaics, but there is increasing interest in wind, waste, biomass, and ocean and wave energy. The government has also added electric buses to the public transportation fleet and tabled a proposal for a multi-million-dollar 30 MW multi-source plant and green energy park. The Barbadian renewables market is seeing growth in various sectors.

What are the Barbados Telecom PV sites

Since 2015, there are more than 200 thousands telecommunications sites in 35 countries using IPandee MPPT solar charge controllers, we have won or helped our customers to win more ...

The Mission of the Telecommunications Unit is to facilitate a competitive, fully liberalized telecommunications sector while achieving Government's vision of making Barbados a centre ...
