What are the different types of power plugs in Romania?

In Romania, there are two main types of power plugs and outlets: Type C and Type F. Type C: Type C plugs have two round prongs on either side of the plug, commonly known as Euro plugs. Mostly used in Europe, South America, and Africa. Type C outlets can be fit with either Type E or Type F plugs.

Which plug sockets can be used in Romania?

Type C and type E plugs can also be used thanks to their compatibility with type F sockets. Typically, type C plug sockets are not allowed to be installed in Romania: these outlets are not earthed and are therefore considered dangerous. Only type F power points are permitted because they are grounded and therefore significantly safer.

Which plug type is compatible with a Romanian power outlet?

It's important to note that plug type C, which has two round pins without earth clips, is also compatible with type F outlets. The standard voltage in Romania is 230 volts and the frequency is 50 Hz. This means that most electronic devices designed for use in Europe will be compatible with the power outlets in Romania.

Are there electrical outlets in Romania?

No, the electrical outlets in Romania are different from those in the United States. In Romania electrical outlets of types C & F are used, while the United States has electrical outlets of types A & B. Do I need a travel adapter for Romania? The electrical outlets and power plugs in Romania are of types C & F (see images).

What is the voltage in Romania?

Just like the rest of Europe, the voltage in Romania is 230 volts and the frequency is 50 Hz. Romania has standardized on type F sockets and plugs. Type C and type E plugs can also be used thanks to their compatibility with type F sockets.

Do Europeans need a travel adapter in Romania?

Europeans do not need a travel adapter or transformer when traveling to Romania. Most device plugs will work with the outlet types in Romania. Also, the voltage in Romania is the same as in Europe. What Outlet does Romania Use? Type C plug sockets are used in Europe, Africa and Asia. They have two round pins and no grounding pin.
